

**SIMULATION and VISUALIZATION
of the Wulff Construction
and surface energy for adjoined crystals.**

Joan Adler and Emil Polturak -Technion-IIT
Lilach Saltoun - now at Hebrew University

**Image at upper left is the interface to Lilach's matlab code for cutting and combining crystals,
image at upper right is an AViz rendition of a tilted interface.**

**The present project is based on earlier calculations, codes and experiments with
S.G. Lipson, A. Hashibon, G. Baum and other Technion students and faculty.**

Talk online at: <http://phony1.technion.ac.il/~phr76ja/ath16/ath16title.html>.
